Regional Task Forces <i>Creating High Performing School Improvement Cultures</i>	
3E's College and Career Readiness (3Es) Task Force (Grades 8 - 12)	Career & Technical Education (CTE) Task Force (Grades 11 - 12)
Remote/Blended Learning (RBL) Task Force (Grades K - 12)	Social Emotional Learning (SEL) Task Force (Grades K - 12)
Standards-Based Instruction & Grading (SBIG) Task Force (Grades K - 12)	Science, Technology, Engineering, Math (STEM) Task Force (Grades K - 8)

The purpose of a task force is to explore evidence-based practices that a district or school is considering for implementation in the next few years. The expectations for each task force will be determined by the team members to meet individual and team needs.

All task force meetings will be held virtually. The meetings will include opportunities for team members to network and share common challenges and solutions, and learn about best practice from HSTW/MMGW sites and other districts/schools.

As a result of participation, task force members will:

- Understand the barriers and promising practices by districts and schools currently implementing evidence-based practices to avoid major set-backs.
- Learn the steps taken by administrators and teachers in exploring, planning and implementing evidence-based practices that have resulted in the changes desired with data-driven results that indicate improved student outcomes and achievement.
- Explain the impact to administrators, teachers, students and parents from districts/schools implementing the evidence-based practices.
- Build capacity and buy-in for change by engaging district/teacher leaders in professional development.
- Network with HSTW/MMGW task force member district/school sites to share best practices.
